

GenAI

Pragra is a Canadian emerging ed-tech company. We have vbeen delivering a programmatic learning experience across Canada and the USA on cutting edge technologies like Devops, Cloud Enablement, Full SStack Development, Data Engineering.

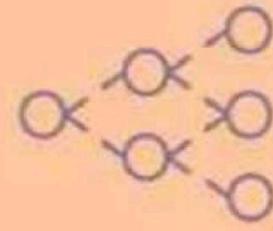

Now we have partnered with tech companies to offer our students more hands-on learning experience with a live internship. ANd we have dedicated career services and a dedicated hring partner network to get you placed

ABOUT PROGRAM

Unlock the world of AI with our 'AI & Machine Learning Bootcamp: From Neural Networks to Model Deployment.' Whether you're a complete beginner or looking to enhance your expertise, this course covers AI fundamentals and advances to complex topics like deep learning, neural networks, and model optimization. Gain hands-on experience, interact with industry experts, and build real-world AI projects. By the end of this course, you'll not only understand AI concepts but also acquire the skills needed to secure a job in the AI & ML field and develop cutting-edge AI solutions.

PROGRAM CURRICULUM

Our curriculum development team analyses the 100's of job postings in the local and international markets, followed by a discussion with hiring managers to keep the focus on the area more relevant to you and companies.

"Pragra's curriculum is extremely fine tuned and we can feel that there has been a lot of iterations to match the industry requirements. They've found different ways to teach you all of the important hands-on skills you'll need to make job ready."

- Sandy Virk

IT Director
All-State Canada

1.

Introduction to Generative AI

Dive into the world of Generative AI, understanding key concepts like LLMs, transformers, and how AI can generate text, images, and more across industries.

2.

Foundations of AI & Prompt Engineering

Learn the core principles behind Generative AI models and master prompt engineering techniques to get accurate and powerful outputs from AI systems.

3.

Python Programming for Generative AI

Build a strong foundation in Python for GenAI, working with libraries and tools used to interact with APIs, process data, and automate workflows.

4.

Working with Large Language Models (LLMs)

Understand how LLMs like GPT work, including tokenization, embeddings, and how to use them for real-world applications like chatbots and content generation.

5.

Embeddings, Vector Databases & RAG

Learn how to store and retrieve knowledge using embeddings, vector databases, and implement Retrieval-Augmented Generation (RAG) systems.

6.

Building Gen AI Applications

Get hands-on experience building real-world GenAI apps like chatbots, Q&A systems, and AI assistants using modern frameworks.

7.

Fine-tuning & Model Optimization

Learn how to fine-tune models and optimize performance for specific use cases, improving accuracy and efficiency.

8.

AI Agents & Automation

Explore how to build AI agents that can perform tasks, automate workflows, and interact with tools and APIs.

9.

Generative AI in Industry Applications

Understand how GenAI is transforming industries like marketing, healthcare, finance, and software development.

10.

Multimodal AI (Text, Image, Audio)

Learn how AI works across multiple formats including image generation, speech-to-text, and text-to-image models.

11.

Deploying Generative AI Applications

Gain experience in deploying GenAI applications using cloud platforms and integrating them into real-world products.

CAREER SERVICES

Pragra has dedicated career services team, which provides wide range of services to make you marketable and presentable for right opportunity.

LINKEDIN PROFILE

LinkedIn profile is the next place a recruiter or hiring manager is going to visit after reading your resume. Our expert will help to setup your profile to display your credibility both as a jobseeker and professional.

GITHUB/MEDIUM

The question "Do you contribute to open-source?" is now one of the most common questions asked in phone screens. Pragra encourages to develop small projects & do blogging on Medium to showcase your's learning in the domain you have chosen.

RESUME SERVICES

Everything start with a resume, 90% resumes are reject in 10 second glance, our experts helps you to showcase your skills so that a potential employer is quickly able to see how your individual experiences can contribute to a company's success.

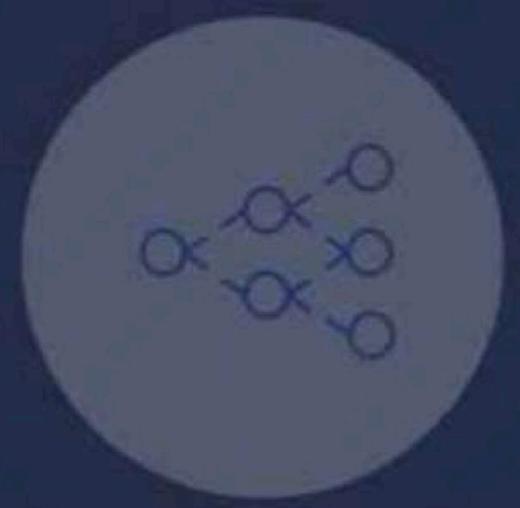

PLACEMENT DESK

Our dedicate placement/outreach desk help to market your resume to prospective employers hiring in domain of your learning. Our Team constantly monitors and touch base employer for active and upcoming positions, to get you first hand information and presentation.

SOFT SKILL DEVELOPMENT

Soft-skill is intregal part of your tech-career, our team will help you to learn presentation and vocal skills training help to perform better in interviews and job.

How Do I Enroll ?

Visit us for free consultations and a more detailed view of our program. If you're ready to enrol you can apply on our website today. After we receive your application, our career advisor will review your application and will assist you with further steps.
